Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on September 23, 2004.

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1-16 and 25 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, 5-11, 26, 32, and 33 of copending Application No. 10/107,761. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are directed to analogous methods for treating a patient having or at risk for macular degeneration characterized by fluid leakage from new blood vessels proliferation.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 25 is again rejected under 35 U.S.C. 102(e) as being anticipated by Guyer U.S. 2003/0171320 A1.

Guyer discloses a phototherapeutic method for treating or alleviating macular degeneration characterized by fluid leakage from new blood vessel proliferation in the macula of a patient, the methods comprising the steps of: providing an effective amount of a photosensitive agent to the blood vessel; activating the blood vessel with a low energy light to damage the vessel; and directing to the macula a high energy light sufficient to generate heat to coagulate the fluid leakage as presently claimed. See page 1, paragraph 0008; page 2, paragraphs 0019 and 0022; page 3, paragraph 0079; and claims 1-3 of Guyer.

Response to Arguments

3. Applicant's arguments, filed on September 23, 2004, with respect to the rejection(s) of claim(s) 1-16 under 35 U.S.C. 102(b), 102(e), and 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

However, with respect to claim 25, the applicant's arguments are not persuasive. Therefore, the rejection of claim 25 under 35 U.S.C. 102(e) is being maintained.

Claim 25 merely recites a method for treating or slowing progression of macular degeneration of a patient's eye by using both photodynamic therapy (PDT) and laser photocoagulation. Guyer clearly teaches a therapeutic method of treating or alleviating macular degeneration, using both PDT and laser photocoagulation (see Guyer, page 6, paragraph 0079).

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ahmed M Farah whose telephone number is (571) 272-4765. The examiner can normally be reached on Mon-Thur. 9:30 AM-7:30 PM, and 9:30 AM - 6:30 PM on every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C.M DVorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-0758.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (571) 272-4724.
